## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of claims 17-20 in the reply filed on July 28, 2006 is acknowledged. Therefore, upon further consideration, the following office action is provided in order to expedite the prosecution of this application.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 3737

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Holcomb (US 6,042,531).

Holcomb discloses a device for magnetically assisted surgery of a patient comprising: a magnet support structure; a magnet having at least four poles, the magnet attached to the magnet support structure so that the magnet provides a near-field magnetic field in an operating region within a patient, the magnet being moveable to alter a direction of magnetic field lines in the operating region within the patient (see figures 9-11), wherein the magnet is a quadrupole magnet (see figure 1), wherein the magnet is a permanent magnet (see figure 6 and related description), wherein the

Art Unit: 3737

magnet is generally cylindrical and has a radius and an axis perpendicular to its radius (see column 49, lines 20-67, column 50, lines 1-28).
